GUEST LECTURE

on

Mitigating Cyber Risks in Ever Increasing Online Exposure of the Users

Organiser: Department of Management, Maharaja Agrasen Institute Of Technology

Date: 11th April,2023

Timings: 11:00a.m.

Venue: Block 7 (Room No. 751)

Faculty Coordinators: Dr. Sanjeev Kumar and Dr. Anoop Kumar Gupta

A Guest Lecture on **"Mitigating Cyber Risks In Ever Increasing Online Exposure Of The Users"** was organised for the students of MBA by The Department of Management, MBA, Maharaja Agrasen Institute Of Technology on 11th April,2023. The resource person for the event was **Mr. Ashutosh Bahuguna (Scientist E), CERT- In, Delhi.** The event started at 11:00 a.m. The Guest Speaker was welcomed by Prof. (Dr.) Amit Gupta with a Memento as a token of appreciation.

A brief introduction about the topic of the lecture:

Cyber-attacks hit businesses and private systems (used by individuals) every day, and the variety of attacks is ever increasing. According to former Cisco CEO John Chambers, "There are two types of companies: those that have been hacked, and those who don't yet know they have been hacked."

The motives for cyber attacks are many. One is money. Cyber attackers may take a system offline and demand payment to restore its functionality. Ransomware, an attack that requires payment to restore services, is now more sophisticated than ever.

Corporations are vulnerable to cyber-attacks, but individuals are targets too, often because they store personal information on their mobile phones and use insecure public networks. So, it is important to understand the emergent cyber risks involved in poor cyber hygiene.

The speaker started by discussing the various risks that individuals and organisations face in today's online environment. He highlighted that with the increase in online exposure, individuals and organisations are more vulnerable to cyber-attacks, such as double extortion, triple extortion, and ransom ware attacks.

The speaker walked the students through a series of slide and discussed the importance of mitigating cyber risks and emphasized the need for individuals and organisations to adopt a proactive approach to cyber security. He highlighted that individuals and organisations should be aware of the various cyber threats and should take necessary precautions to safeguard themselves against these threats.

The event was highly informative and engaging. The speaker provided valuable insights into the topic. The lecture provided the students with a better understanding of cyber security and ways to mitigate it. The lecture was fruitful to spread the awareness among students about the topic.
